- 4.Afghans, the victim of foreigners political games.**
- 5. Why murderers in Afghanistan do not face trial?!**
- 6 . Islamic countries' scholars gathered in kabul.**

A story of violence which is revealed after 30 years

Afghanistan's Hasht-e-subh newspaper has revealed a chapter of the cruelty, violence, and barbarism of the brutal communists in Afghanistan, which unfolds the murder of five thousand Afghans through their intelligence agency first called "AGSA" then called "KHAD" on 1357 and 1358 in the prisons of that regime.

Ahmad Zia Rahim Zai

The interesting section of the report is that, the Holland government authorities during the investigation of the ignominious (AGSA) intelligence agency's member named AMANULLAH A's file during the authority of the KHALQ's regime, they found access to documents of the cruel assassination of five thousand innocent Afghans which reveals the history of the violence and abhorrence of these slaves and their red savage masters during the puppet authority of KHALQ and PARCHAM regime .

It is not hidden anymore from any one;

That after more than thirty years, the innocent afghans' blood is still shedding and still innocent and suffered Afghans are getting suffered by war, killings and destruction while tens of countries' civilian and armed forces have presence under the name of international community from more than ten years up to now.

We must accept that after thirty years of the dirty rule of communists, the situation has changed , international standards, politics are so different from that times , in this field the situation in Afghanistan has changed, but something which is still steady like the past is the general massacre of innocent afghans which before were done in the prisons of ignominious (AGSA) and (KHAD) intelligence agency by puppet KHALQ and PARCHAM regime and the red forces, But today it is done by the so called human rights and democracy international leaders through blind bombings , and bullets coming out from the barrels of their half mental soldiers 's rifle and armed conflicts.

During the wild authority of KHALQ and PARCHAM regime, the general massacre of innocent Afghans is not limited to the five thousand afghan's list which is revealed now

the stories of assassination and alive burring of this ignominious regime in the prison of (PUL E CHARKHI) and other prisons are so much that a special book can be written and some are written too from the each story, but the matter is that today by the cause of the some MOJAHIDEEN and JEHADI leaders' mistakes and abhorrent actions, some communists and even their commanders which has direct responsibility for the killings, criticizes the Mujahedeen and try to prove themselves innocent but they will never be proved innocent from this guiltiness on the basis of any law of the world.

The thing very interesting in this report is that the person named AMANULLAH A. which worked for the AGSA intelligence agency had acknowledged and confessed that in that regime promotion was only gained by killing people. He wanted to get politic asylum in Holland, although Holland like any other western country did not deport him from their country but his request as a political asylum seeker was not accepted.

It is not only Amanullah A. that requested to get migrated in the peaceful shade of western democracy after committing anti humanity crimes , historical violence and after working in the ignominious intelligence agency of communist regime, the world has witnessed that very big numbers of such killers and ignominious people are now living in the shade of western democracy in different countries ,and while forgetting their crimes and violence, they are teaching others to defend human rights and democracy .

However according to this report "AMANULLAH A" who applied for political asylum in Holland on 2010, as the result of unknown illness died on 2012, but today there are other such kind of people that are walking freely and are laughing on the innocent afghans who were detained and killed just for praying in their schools and offices.

Today some of such famous faces are making programs for Afghanistan through western broadcasting channels and they are not even ashamed of their yesterday's crimes, today they dissimulate themselves and others by deceiving people through slogans of democracy and freedom of speech.

The wild assassination of the 5000 thousand innocent prisoners highlights the big crimes of communists and red Russians invader for more than a decade in Afghanistan, on one side it shows the cruelty and barbarism and the crimes of communists on the other hand it reveals that our innocent afghans have scarified much for their religion, home and honor, more than a million and half people have been buried, more than a million are widowed, and more than millions of orphans are there. But unfortunately the Jihadi leaders spoiled the wishes of these people.

Now the western world by deceiving Afghans through the slogans of two folded democracy, human rights, women rights and freedom of speech wants to tighten their forced colonialism authority on the innocent and poor countries and the crimes of the past communists are not important for them although as they have admitted that the communist regime has committed anti humanity crimes and violence to their own people, but how can afghans forget these cruelty and crimes that they have tolerated and why?

It might not be possible to punish these criminals now, but the time is not too far the countries that will be obliged to listen to the people and the sorrowful stories of such will be judged.

In the list you see the Names of around 5 thousands individuals who were killed by previous communist regime of Afghanistan and it has been recorded by high official authorities.

A number of political analysts are emphasizing that the real palyers and leaders of communist regimes that had hands in the killings and murders must be summoned to a court.

Mohammad Akbari one the previous Jihadi leaders and people's representative in the parliament has said that such kinds of lists reveals the extent of suffering and disasters which afghans have faced throughout the history.

Mr. Akbari states that real factors of these offenses and the important players of this field who have had hands in these offenses, must face trial in a court.

He explains: We do not say that all of afghanistan's communists must be face trial but those who signed on the killing permissions of afghans must face trial and it is the present government's responsibility.

Mullah Beradar got free form Pakistan's prison.

Pakistan's government declared that Mullah Abdul Ghani Beradar has been released from Pakistan's prison on 30 Sunbula of 1392.

It comes after long and boring discussions between the afghan and Pakistan's governments and after back to back requests from the afghan government which was rejected again and again by the Pakistan's government .finally he was released last week. But Pakistan's government has refused to hand him on to Afghanistan's government and has stated that he would help the peace process while staying in Pakistan or other place.

Mulah Abdul Ghani, was a deputy of the Ministry of Defense of the Taliban group when collapsed. He was in Pakistan's prison from that time untill he was released last week. He was one of the founders of Taliban movement in the year 1994 and is one of the trusty commanders of Taliban leader Mulah Mohammad Omer.

Shahzada Shahid: the spokesman for the supreme peace council says: First demand of Afghanistan is his transfer to the country whereas islamabad says he wouldnot be transfered to afghanistan

.Wahid Muzhda: Writer and political affairs analyst considering the release of Mulah Brother and his role in peace negotiations believes that after the trip of Hamid Karzai to Pakistan and their negotiations with pakistani officials, it seemes that some hidden decisions have taken place regarding this matter between both parties that instead freeing Taliban leaders in pakistan or handing them on to afghansitan, an office must be provided for them in a third country and the peace nogotiations must continue from their.

Wahid Mujhda, believes that a series of regional political games beyond Pakistan are going on and according to Mujhda, recently officials of Afghanistan, Pakistan and Saudi Arabia have agreed upon a few points which consists the opening of an office for the the Taliban in another place and the transfer of Mullah Beradar to their.

wahid Muzhda based upon his information also expresses that the mentioned countries have agreed that Mullah Agha Jan Motasim one of the past taliban leaders which is residing in Turkey, would be the head of this office and Mullah Beradar would also be transferred there. He also adds that however the negotiators of Taliban in Dubai have claimed that Mullah Agha Jan Motasim participates at these negotiations by the order of Mullah Mohammad Omar but, as Muzhda says, the Taliban who are residing in Qatar and also the leadership of Taliban in Afghanistan and Pakistan have rejected any relation of Mullah Motasim with Mullah Mohammad Omar and have said that he is carrying the process by himself.

Muzhda believes that because Afghanistan's government do not have any initiative in this field, that is why different countries and individuals interfere in the peace process to take benefit of it for their country.

Afghans, the victim of foreigners political games.

Today, politics play big role in changing societies towards renovation or destruction.

A part of the political activity which has drawn attention of everyone towards itself, is something called war against terrorism.

Joseph Danford the general commander of foreign forces in Afghanistan said in a memorial ceremony of the NATO soldiers deaths in the so called war against terrorism, that they are committed to cooperate with Afghan soldiers in the war against terrorism..

meanwhile Besmillah Mohammadi, the defense minister of the country says that achievements of the last decade is a symptom of Afghan and foreign security forces sacrifice in Afghanistan.

Now, the question is that why commander of the foreign forces still tries to give confidence that Afghanistan would not turn back to become a safe place for the so called terrorists? Does not this mean that the west have lost the battle against the so called terrorism?

While it was expected that after the twelve years of the foreign countries' military, intelligence and political presence, there would be nothing of the so called terrorism left, but now we see that most parts of the country are witnessing the presence of the government's military opposition and they are acting stronger than any other time.

Killings of the tens of police forces in Badghis, Farah, Badakhshan and ... is an indicative that the armed oppositions are having their base in Afghanistan and war with them has entered into an inconclusive period of saving the foreign soldiers lives and their bases.

If they really want to end the war in Afghanistan- that is what they do not want- first they should assure the people of Afghanistan that they would not turn Afghanistan into the field of war because terrorism and the anti terrorism are the result of the inconclusive games of the west to reach their long term goals in Afghanistan and the real victims of this war are the defenseless people of Afghanistan.
