Who were each personally not disclose its opinion extermination crisis is reaching the end and peace in Afghanistan and is inaccessible to end the occupation in Afghanistan our official status and permanent peace.

A brief review on the decision:

The two-day Doha Summit in Declaration is the article 9 that emphasizes the need for stability in negotiations, while emphasizing the face of talks between the US and the Taliban. Similarly, the resolution also emphasizes that this is the way to reach a lasting, global and honorable peace in Afghanistan "all-inclusive intra negotiations."

Besides that in this agreement a number of important points that was similar intra less attention in the past negotiations, as follows:

1. Soft language usage

Although the presence of a two-day international conference on Doha, the Afghan Taliban and the Afghan government had been asked by various activists and peace

activists, to propagate a war against propaganda, instead of one another. Use it to make a difference in front of a few conversations. But these demands were not accepted much.

But now it is the first time that the Afghan Taliban and Afghan consulate emphasize using a formal lecture on soft-spoken languages in formal negotiations aimed at adopting international negotiations in a written letter.

2. Emphasis on reducing the violence

In the past eighteen years, most grievously ravaged public institutions and the public is reached. The United Nations 2017 report to date 70188 civilians was killed and it has been the figures in recent years compared to other years. The landing discrepancy against different directions as UNAMA management attention from both sides to protect the lives and properties of civilians during the war was asked few times to also address the situation immune attention to welfare institutions and prisoners.

But now it is the first time in a decision-making letter by Afghan politicians and Afghan Taliban to release prisoners of illness, immune and illness. Security guarantees of public-welfare organizations such as religious and religious centers, hospitals, markets, water closures and workshops. The commitment to protecting people's respect, life, property and homes, and civilian casualties has been emphasized on reducing zero levels.

3. Right to religious and religious minorities

Some minorities in Afghanistan live shortly. Although were in their rights to special attention in past governments and the national unity government also has special

attention to the rights of minorities and Hindus and one seat to the stage Knowledge Hindu minorities also been added, but still It is worth mentioning that religious and religious minorities have been affected by the current security situation. In addition to the Afghan Taliban's Emirate There was no proper treatment of some religious minorities. Meanwhile, one of these minorities in the country is facing some concerns despite ongoing peace negotiations.

The decision-making also was respected and safeguarded for minority religious and religious rights, as it was considered to be a good development in the safety of minority rights.

4. Way to Peace (Roadmap)

In the beginning of the National Unity Government, the Afghan government started a series of international conferences called "Kabul Process" after various efforts from the establishment of a consensus on the Afghan peace-related region. Afghan government led initiative and management of the process and started implementing the decisions were in the hands of the government. In the second session of this series, the Afghan President sets out a political and legal framework for peace talks, recognizing the government of Afghanistan, in order to ensure security of all reconciliation, especially the reconciliation Taliban, for security and social development. implementation of programs, to attract international support for peace and a comprehensive implementation framework through emergency, short term, and elected term conditions and objectives in all areas of development to create an effective mechanism for monitoring and evaluation that Access to the peace negotiations or peace with the Taliban as leaving the highway (map) result.

But still in peace talks with the Afghan Taliban in international negotiations and resolutions the “design” was not presented but it is the first time that Afghan Taliban and Afghan consulate presented a resolution in peace in a decree letter.

To facilitate the way to international interaction, the Islamic system in Afghanistan, in the beginning and implementation of the transition to the average peace, peace process and monitoring of peace treaty, basic institutions, defense and other National institutions that are owned by all Afghans, after the reconciliation process, reinforce the necessary reforms and strengths, to return to their displaced families, as refugees from the Afghan refugees and their displaced families, after the peace treaty with donor countries. Regarding the new cooperation and relations of cooperation, international guarantees in the International Conference on Afghanistan Supporting Afghanistan's peace treaty has been emphasized on the international conference in the context of regional, neighboring countries and other non-interference in Afghanistan.

Same figure A few months ago (2019 in February) that the first time the Russian capital Moscow, discussed directly between the politicians and the Afghan Taliban issued his declaration as a result of this the decision is not fully supported.

Approval also decided to nominate meeting in Moscow signed; and all participants agreed the Islamic Conference, United Nations, Security Council, European Union and neighboring countries that the Doha intra About Peace Meeting decisions should be supported and supported.

Conclusion

During the second round of negotiations between the Afghan Taliban and the US, the Doha International Conference on Doha was welcomed by the various sides of the country and abroad, and the results of Afghan peace once again Resigned.

In addition, there is hope to see the responses to the Afghan Taliban, the Afghan government, and some other countries, that the meeting will also open the way forward to the talks between Afghan Taliban and Afghan Taliban.

Also in the meeting at the points that had previously been controversial, now the Afghan Taliban and the Afghan Convention have reached the agreement that emphasizes the importance of maintaining Islamic values and human rights in Afghanistan, for peace talks, Fighting parties have demanded no use of language, attacks on civilian facilities and public places and reduction of violence throughout the world.

The first International Conference on Peace in Moscow in Moscow, and now a meeting held in Qatar has done much to bring permanent peace in Afghanistan, and the two sides have pledged to do so until then.
